

**Metro Region Ash Tree Study  
JN 84386**

**Question:**

Please provide a shapefile for the area that MDOT considers to be urban freeways and rural freeways. We need this information to prepare a bid. Thanks.

**Answer:**

A map of the Metro Region trunklines, and the urban and rural boundaries, has been posted with the RFP. It is a pdf file. The RFP states, however, that the quantity of "urban trunklines" – requiring the more intensive survey work – probably will be decreased in the field. (The selected vendor, in consultation with MDOT, will be allowed some independent judgment in the field as to what areas require an urban or rural survey approach. Determinations will be made based on the character of the rights-of-way.)
